

IN THE SUPREME COURT OF THE REPUBLIC OF SINGAPORE

REGISTRAR'S CIRCULAR NO. 4 OF 2002

SUPREME COURT IS AN INTERNET HOTSPOT

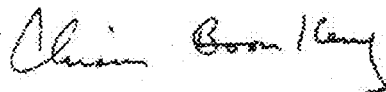

The Supreme Court is now an internet hotspot. A hotspot provides wireless Local Area Network roaming internet access service to its subscribers. This service is provided by BluEngine and is the same service provider for more than 20 internet hotspots in Singapore, including Singapore Arts Museum, Suntec City and Bishan Community Library.

2 With the hotspot in Supreme Court, that means lawyers, paralegal and members of the public who subscribe to BluEngine, will be able to access their office e-mails and other internet resources when they transact in the designated areas of the Supreme Court i.e. the Supreme Court Library and the Registrars' Corridors (Levels 1 and 2). BluEngine subscribers will be able to access internet not only from Supreme Court but from any of the hotspots equipped by BluEngine.

4 This initiative not only allows Supreme Court to provide our customers with better service, it also contributes to the nation's effort to move towards a connected island.

5 For more information on BluEngine's hotspot and to subscribe, please visit their website (<http://www.bluengine.com>).

Dated the 24th day of May 2002
